Since the customer has not been exposed to microwave drying machines before, he

asked some questions, and we actively answered them.

1.Q?What Is The Difference Between Air-Cooled Magnetron And Water-Cooled Magnetron?

A:Water-cooled magnetron for continuous non-stop operation. Air-cooled magnetron can not work without interruption, but the price is lower than water-cooled magnetron. This type of magnetron is suitable for low power machine, or the areas with low ambient temperature.

2. Q: What Are The Components Of Industrial Tunnel Type Plantain Herbal Microwave Drying Machine?

A:

Main Components Of Industrial Tunnel Type Plantain Herbal Microwave Drying M	
1	Microwave Cavity
2	Microwave Generator
3	Waveguide
4	Suppressor
5	Material Handling Mechanism
6	Heat And Moisture Dissipation Mechanism
7	Measurement System
8	Automatic Control System
9	Operator Interface

3. Q: What’s The Advantages Of Industrial Tunnel Type Plantain Herbal Microwave Drying Machine?

A:

Advantages Of Industrial Tunnel Type Plantain Herbal Microwave Drying Mac	
NO.	Features Of Plantain Herbal Microwave Drying Machine
1	**Uniform drying:** Microwave drying can make the object list and uniform penetratio waves generate heat.
2	**Drying speed:** Microwave directly effect water molecules, make the water in the m rapid vaporization, rapid drying, greatly increase the production effi
3	**Not discoloration in drying:** The oxidase activity is passivated at high temperature oxidation is inhibited to keep the color of tea, vegetables and flower
4	**Drying leaf quality is good:** instant high temperature drying, rapid evaporation of good water absorption, easy to brew, suitable for green tea and tea po
5	**Applicable materials:** widely used in flowers such as honeysuckle, chrysanthem kinds of fresh vegetables and various kinds of tea and other microwa

Ibrahim told us that he wanted the output of 600kgh, and our engineer customized a quotation for the 600Kg/H Industrial Tunnel Type Plantain Herbal Microwave Drying Machine for the customer according to the his requirements and Plantain's characteristics. And Ibrahim visited our factory by video phone and watched our factory test 600Kg/H Industrial Tunnel Type Plantain Herbal Microwave Drying Machine.

He was very happy with our Herbal Microwave Drying Machine and promised we would place an order soon. On December 25th, we received the deposit from Ibrahim and promised that we would complete the production within 40 working days.
