100kg/h Fried Dough Extruder Machine ordered by Laos-China Factory

The fried dough snack machine is suitable for pressing flour and other raw materials through multiple pressing rollers. It is cut into different shapes by a special mechanism. After frying and flavoring by fryer machine, drum flavoring machine, we can get crispy and delicious snacks food such as Malaysia Shrimp Pasta, fried sticks, square pellet, chips. Etc. We can offer full design processing machine and recipe for processing fried dough snack. The fried dough snack has reasonable design and simple operation.

When communicating with Chinese customers in Laos, customers are more concerned about the operation and installation of the machine. We introduce some steps to operate and inspect the machine:

Installation And Commissioning:

1. The four feet of the machine should be flat to reduce vibration; the ground wire should bottom of the frame (equipotential terminal) to prevent the danger of leakage.
2. Check whether the fasteners are loose, and check whether the power cord switch is in
3. Add an appropriate amount of lubricating oil to the gear.

4. Add an appropriate amount of lubricating oil to each oil hole or oil cup and insist on adding.
5. The operation should be stable without abnormal noise.
6. After the empty car runs for 30 minutes, check the solid parts before starting the work.

At the same time, we also talked about some after-sales installation issues:

Item No.	Service Of Fried Dough Extruder Machine
