## The Advantages Of Automatic Fresh Potato Chips Frying Making Machine

- 1.The whole design is compact, reasonable and easy to operate of continuous fryer machine.
- 2.Dry temperature, adjustable time, drying effect is excellent.
- 3.Food fryer machine adopts double-pitch roller chain transmission and round-trip drying. It runs smoothly and there is absolutely no jamming.
- 4.The potato chips fryer machine equipped with an efficient and energy-saving combustion system, the heat source is distributed reasonably, the material is heated evenly, the energy consumption is low, and the output is large.

This automatic continuous snack fryer is developed on the basis of our company's research and study of foreign advanced technology, and its technical performance and product quality have reached the world's leading level. An advanced puffing machine with flexible configuration, wide application of raw materials and convenient operation.
