

## 220-260kg/h Doritos Tortilla Corn Chips Making Machine Ordered By Colombia Customer

220-260kg/h Doritos Tortilla Corn Chips Making Machine Ordered By Colombia Customer by Shandong Loyal Industrial Co.,Ltd. , we provide latest information about the products regularly.

A customer from Colombia found our company through Alibaba. He has produced this product in another company before. He is an engineer himself and has saved some money. Now he wants to build a small factory by himself.

This Colombian customer first asked what volumes we had to choose from:

Model	LY65	LY70	LY85
Install Power	45KW	90KW	110KW
Consumption Power	38KW	77KW	83KW
Output	120-150KG/H	220-260KG/H	500-600KG/H
Dimension	19000×1300×2200M	22000×1300×2200M	30000×1300×2200M
Doritos chips processing line	24,000-29,000	32,000-46,000	52,000-63,000
Price (USD)			

In the end, this Colombian customer chose a production line of 220-260kg/h according to his own budget. We introduce the Colombian customer about the process of the machine in detail and showed the video of the machine running. The Colombian customer was also very happy to visit the factory with us by video call.

Mixing system---Pressing system----Shaping system---Drying system---Frying System---Flavoring System --Packing system

## Detailed Information of the main machine in the **doritos chips** production line:

Twin-screw extruder	<ol style="list-style-type: none"> <li>1. The main extruder adopts frequency speed controlling with high accuracy.</li> <li>2. The screws are made of the stainless steel and special craft, which can ensure durable usage, high pressure, and longer life.</li> <li>3. The forced lubrication system, which can guarantee the equipment's normal operation.</li> <li>4. Auto-temperature control system and self-cleaning, which makes it easy to maintain.</li> <li>5. It has the widest range of applications and can produce different products.</li> </ol>
Continuous fryer	<ol style="list-style-type: none"> <li>1. World-famous Brand Electronic Apparatus ensure Excellent and Stable Performance.</li> <li>2. Controller Box made of Stainless Steel or Sprayed-plastic(optional).</li> <li>3. Frying Time by Variable Conveying Speed as required, Alarm Oil Level, etc.</li> <li>4. Double Layer Stainless Steel Belt, Preventing Products Floating, Ensuring Perfect Frying Effect.</li> <li>5. Scrapers fixed on the belt, Make the products come out easily.</li> <li>6. Electric Belt and Upper Cover Lifting Setting, Make Cleaning more convenient, Save Human Power.</li> </ol>

Flavoring line

1. Spraying the oil in the roller.
2. The inside turning container is very sanitary because of adopting t material.
3. Material touching food is stainless steel.
4. The inside of the roller is also uneven, the main purpose is to more

### After-Sales Service & Installation:

Item No.	Service Of Continuous Belt Biscuit Oven
1	12 months warranty.
