

600Kg/H Industrial Tunnel Type Plantain Herbal Microwave Drying Machine For Sale In

600Kg/H Industrial Tunnel Type Plantain Herbal Microwave Drying Machine For Sale In Iran by Shandong Loyal Industrial Co.,Ltd., we provide latest information about the products regularly.

In November 2021, this Iranian customer added my WhatsApp through an old customer introduction, his name is Ibrahim, and he has a plantain farming farm in . He wants to buy 600Kg/H Industrial Tunnel Type Plantain Herbal Microwave Drying Machine to dry plantains in .

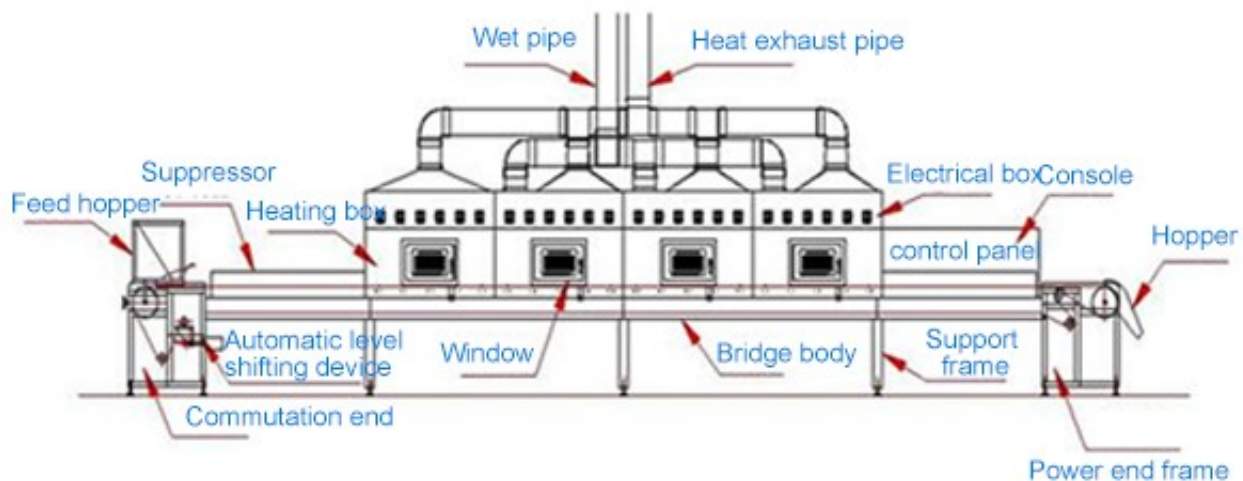

Sample of 600Kg/H Industrial Tunnel Type Plantain Herbal Microwave Drying Machine

Johnny said that she used to dry the plantain in the drying room, but the quality of the plantain dried in the drying room is uneven, the efficiency is low, the drying temperature is difficult to control, and it is gradually unable to adapt to scale, modernization and seasonality. developing. So she decided to buy microwave equipment to dry plantain on a large scale.

Compared with the drying method of drying room, 600Kg/H Industrial Tunnel Type Plantain Herbal Microwave Drying Machine can precisely control temperature and humidity, with a high degree of automation, and does not require special personnel to take care of it.

MICROWAVE DRYING EQUIPMENT WORKING PRINCIPLE DIAGRAM

600Kg/H Industrial Tunnel Type Plantain Herbal Microwave Drying Machine Layout

Our company has more than 10 years of experience in selling plantain microwave drying equipment to . Plantain is a medicinal material with very good prospects, so for customers, purchasing microwave equipment for mass production is a very good choice.

What's The Advantages Of Plantain?

Advantages Of Plantain	
NO.	Advantages of plantain
1	After taking plantain, it has the effect of expectorating phlegm and relieving cough, and slower. Therefore, if the body has various diseases such as chronic bronchitis, plantain can be very good. Body recovered;
2	Plantain has a certain diuretic effect, so it has a good therapeutic effect on
3	Plantain also has a certain effect on the stomach and intestines. After entering the secretion of intestinal juice, but this is temporary
4	If there is diarrhea in children, soaking plantain in water also has a very
5	Plantain also has a certain role in resisting pathogenic microorganisms, which inflammation of the body, and has a good therapeutic effect on various jaundice, hemorrhoids, dysentery and mumps.

Since the customer has not been exposed to microwave drying machines before, he

asked some questions, and we actively answered them.

1.Q?What Is The Difference Between Air-Cooled Magnetron And Water-Cooled Magnetron?

A:Water-cooled magnetron for continuous non-stop operation. Air-cooled magnetron can not work without interruption, but the price is lower than water-cooled magnetron. This type of magnetron is suitable for low power machine, or the areas with low ambient temperature.

2. Q: What Are The Components Of Industrial Tunnel Type Plantain Herbal Microwave Drying Machine?

A:

Main Components Of Industrial Tunnel Type Plantain Herbal Microwave Drying Machine	
1	Microwave Cavity
2	Microwave Generator
3	Waveguide
4	Suppressor
5	Material Handling Mechanism
6	Heat And Moisture Dissipation Mechanism
7	Measurement System
8	Automatic Control System
9	Operator Interface

3. Q: What's The Advantages Of Industrial Tunnel Type Plantain Herbal Microwave Drying Machine?

A:

Advantages Of Industrial Tunnel Type Plantain Herbal Microwave Drying Machine	
NO.	Features Of Plantain Herbal Microwave Drying Machine
1	Uniform drying: Microwave drying can make the object list and uniform penetration. Microwave waves generate heat.
2	Drying speed: Microwave directly effect water molecules, make the water in the material rapid vaporization, rapid drying, greatly increase the production efficiency.
3	Not discoloration in drying: The oxidase activity is passivated at high temperature, and the oxidation is inhibited to keep the color of tea, vegetables and flowers.
4	Drying leaf quality is good: instant high temperature drying, rapid evaporation of water, good water absorption, easy to brew, suitable for green tea and tea powder.
5	Applicable materials: widely used in flowers such as honeysuckle, chrysanthemum, and various kinds of fresh vegetables and various kinds of tea and other microwaveable materials.

Ibrahim told us that he wanted the output of 600kgh, and our engineer customized a quotation for the 600Kg/H Industrial Tunnel Type Plantain Herbal Microwave Drying Machine for the customer according to the his requirements and Plantain's characteristics. And Ibrahim visited our factory by video phone and watched our factory test 600Kg/H Industrial Tunnel Type Plantain Herbal Microwave Drying Machine.

He was very happy with our Herbal Microwave Drying Machine and promised we would place an order soon. On December 25th, we received the deposit from Ibrahim and promised that we would complete the production within 40 working days.
