

200-250kg/h Tunnel Microwave Spice Powder Sterilization Dryer Drying Machine Will Be Sent To Comoros

200-250kg/h Tunnel Microwave Spice Powder Sterilization Dryer Drying Machine Will Be Sent To Comoros by Shandong Loyal Industrial Co.,Ltd. , we provide latest information about the products regularly.

We have more than ten years of experience as an tunnel microwave spice powder sterilization dryer drying machine engineer.

july once studied in china and learned a lot of traditional chinese knowledge. He likes chinese food very much and loves china.

After studying abroad, july returned to his own country, comoros. As an tunnel microwave spice powder sterilization dryer drying machine engineer, he entered a very large local spice company. Their company wanted to make spice powder. The microwave manufacturer of the company caught july's attention, and july was very interested in our company's spice powder sterilization dryer drying machine.

July, as the main person in charge, communicated with me, their main dry materials are chili powder, soybean powder, cumin powder. July and other engineers at their company determined the moisture content before and after drying. It was finally determined that the output was 200-250kg/h. We made a quotation according to the customer's requirements, and then marked the parameters for the customer.

Sample of Spice Powder Sterilization Dryer Drying Machine

parameter of spice powder sterilization dryer drying machine		
rated input power	180kva	
microwave output power	150kw	power can be automatic
microwave frequency	2450mhz ± 50mhz	22400x 1500x 1800
appearance size of equipment	lengthxwidthx height	
microwave action area	lengthxwidthx height	
conveyor belt width	800mm polyethylene ptfe doth tape	
conveyor belt height from ground	600±50mm	
transfer speed	0-6m/min	frequency
microwave transmission power	3.0	frequency
ambient temperature	-10-40x?	relative humidity <80%

After looking at the parameters, July felt that the size of the spice powder sterilization dryer drying machine was very large. We asked July about the factory area and drew the layout according to his factory area. ?Layout of spice powder sterilization dryer drying machine? because of the first cooperation, we invited July in China to visit the factory and made a video call with July on the spot. July was in charge of this project with him and explained the composition and details of our machine.

July asked some questions during the video call:

What is powdered food?

Powdered foods are edible powders that are made from raw food materials after processing such as grinding and dehydration.

For example, sesame powder made from sesame seeds, milk powder made from milk, fruit and vegetable powder made from fresh fruits and vegetables, coffee powder made from coffee beans, flour made from wheat, and so on.

Various types of powdered foods are used in various ways in daily life.

Sometimes it can be part of a main meal or snack:

Such as whole grain powder, fruit and vegetable powder, milk powder, kudzu root powder, lotus root powder, etc. Are often used as breakfast or snacks.

Also sometimes used for food flavoring:

Like pepper, allspice, chili powder, flour, starch, etc. Are often used in daily cooking;

Powders like ground coffee, cocoa, matcha, and cinnamon are commonly used in beverages and baked goods.

July went on to ask:

Can all of the ones you mentioned be dry?

We answered: yes, the spice powder sterilization dryer drying machine is very versatile, so just adjust the microwave oven temperature and mesh belt speed, but after drying the spice, there will be a smell in the oven. Pay attention to this problem.

After the video, the customer was very positive about the order. We discussed the payment method, delivery time, and inquired about the shipping cost.

After discussing the machine with the client for a while., The customer placed the order through

ali xinbao payment. Our production department starts producing tunnel microwave spice powder sterilization dryer drying machine for customers. Clients find our service very good and discuss other projects with us. Now, the line has been shipped. It will arrive at the customer's port soon, looking forward to the customer getting the machine and using it as soon as possible!
