Industrial belt type microwave dryer microwave drying machine for herbs leaves tea

Industrial belt type microwave dryer microwave drying machine for herbs leaves tea by Shandong Loyal Industrial Co.,Ltd. , we provide latest information about the products regularly.

As a professional industrial microwave oven suppliers, our herb drying equipment machines are widely used, herb drying equipment can be applied to de-watering vegetable, particle feed gourmet powder, shredded coconut stuffing, organic color, compound rubber, acral fiber, medicine material, small wooden product, plastic product, aging and solidification for the electronic component and device.

Microwave dryer microwave drying machine is a continuous penetrating flow drying equipment applied for drying pieces strip and particles state materials with good ventilation. The herbs leaves tea microwave dryer microwave drying machine is also suitable for the materials such as dewatering vegetable, herbal medicine of traditional Chinese medicine and others, for which the water contents are high and high drying temperature is not allowed. The machine owns the advantages, of fast drying speed, high evaporation capacity and good product quality. The dewatered & filtered cake state paste material should be made into particles or strips before drying process.

Why Most Of Customer Choose Our Industrial Microwave Oven?

No.	Principle Of Herbs Leaves Tea Microwave Dryer Microwave Dryi
1	The materials are uniformly distributed on the mesh belt by the material feeder. adopts 12-60 mesh stainless steel mesh and it is drawn by a transmission devi dryer

2	The dryer is composed of several sections. For each section, the hot air is ci
3	Part of exhausted gas is exhausted by a special moisture exhaust blower. The w an adjustment valve.
4	The hot air passes through the mesh-belt covered with bring water material awa slowly, running speed can be freely adjusted according to the mater
5	The final products after the drying process will fall into the material collec
6	The top and low circulation units can be freely equipped according to the use number of section might be selected according to the production

What Is The Features Of Herb Drying Equipment?

1 Amount of air, heating temperature, time of material sticking on the belt and velocity of feeding material can be adjusted in order to obtain the best drying effect.

2 Herb Drying Equipment's con gyration is very excellent. It can use the netlike belt washing system and cooling raw material system.

3 Hot air can be circularly applied, the energy is greatly saved.

4 Unique air dividing device, it makes hot air distribute uniformly; this can guarantee products'quality.

5 Heating source can be selected from steam, conducting heat oil, electricity, and coal furnace and oil burner

Parameter Of Herbs Leaves Tea Microwave Dryer Microwave Drying Machine

No	Model	Power	Dehydration Capacity(Kg/h)	Sterilization Capacity(Kg/h)	
1	LY-1	12KW	12kg/h	120-150kg/h	
2	LY-2	20KW	25kg/h	200-240kg/h	
3	LY-3	30KW	40kg/h	300-400kg/h	
4	LY-4	60KW	60kg/h	500-600kg/h	
5	LY-5	75KW	80kg/h	800-1000kg/h	
	Microwave leak		<1 mw/cm^2)		

Regarding the industrial microwave oven, customers usually encounter problems:

Q: What is the best way to dry herbs leaves tea**?**

A:Then best way is use herbs leaves tea microwave dryer microwave machine , because the drying speed of the microwave drying oven is usually increased by several times, and the production efficiency of the enterprise will be greatly improved. The microwave dryer microwave machine energy consumption is usually reduced by more than 50%, which can effectively reduce the production cost of the enterprise.The microwave dryer microwave machine realizes uniform drying of materials and pollution-free, and at the same time, it can greatly reduce the drying temperature.

Q: How long does it take to air dry herbs?

A:Different customers have different requirements for drying, so the time is also different. Need to confirm the final dry moisture content.

Q:How do I dry rosemary?

A:Use herbs leaves tea microwave dryer microwave machine, put rosemary are uniformly distributed on the mesh belt by the material feeder and it is drawn by a transmission device and move inside the dryer . For each section, the hot air is circulated separately. Part of exhausted gas is exhausted by a special moisture exhaust blower. The hot air passes through the mesh-belt covered with bring water material away. The mesh-belt moves slowly, running speed can be freely adjusted according to the material property. The final rosemary after the drying

process will fall into the material collector continuously.
