

Visit And Study Of Continuous Fryer Factory

This continuous frying line can be widely used to fry kinds of food, like snack pellets, frying snacks, doritos tortilla etc.

Recently, we visited several factories and took a look at our continuous fryer production line. At present, our factory is quite mature in this aspect of fryer.

1. This continuous frying line can be widely used to fry kinds of food, like snack pellets, frying snacks, doritos tortilla etc
2. It includes frying, conveying, and de-oiling with accurately control.
3. Simultaneous conveying and frying makes continuous production in high efficiency and with less labor.
4. High efficient electrical heating way and optimized structure of frying body can use less oil to realize high oil circulation.
5. Separate frying body and conveyor can be cleaned conveniently. Net belt conveyors make even feeding and discharging.

Some Details Of Our Machine

Automatic continuous frying line is widely used in fried dried fruit nuts, puffed food, meat product, etc, such as rice crisp, sweet sticky rice strips, peanut, beans, and fried cake with sugar, squid, fried chicken, and so on, an ideal equipment to produce fried food.
